Belgorod region Profile

Belgorod region was founded on the 6th of January 1954, and is frontier border of Central Federal District. To the south and west the region borders on the Republic Ukraine, in the north and north-west to Kursk, to the East – with Voronezh regions of the Russian Federation. Total border length of Belgorodchina – about 1150 km, Ukraine border length – 540 km. Total extension from the north to the south about 190 km, from the west to the east – about 270 km. The region consists of 9 urban districts and 13 municipal districts.

As of January 1, 2018, the Belgorod Region includes 312 municipalities.

Total region square – 27.1 tsd. km2, relative share of the region in the territory of the Russian Federation comprises 0.16%, in Central Federal District - 4.17%.

Population number at the 1st of January 2018 – 1549.9 thousand people, including urban population – 1044.5 thousand people (67.4%), rural population - 505.4 thousand people (32.6%).

Regional center – Belgorod - is the city of military glory, with the population number of 391.6 thousand people, situated in 695 km to the South from Moscow. Belgorod – is the important industrial center with the developed scientific-cultural potential

Natural and climatic characteristics

Belgorod region is situated in the center of European territory of Russia. Regions’ territory takes occupies and southern west slopes of Central Russian Upland. Territory surface of the region represent a slightly elevated plain, with southern-west spurs of Orel-Kursk plato of Central Russian Upland, divided by the numerous river valleys and extensive hollow and gully chains. This plateau – is the main water-dividing eminence, defining river system of Dnepr confluents (rivers: Seim, Psyl Vorskla) from the river system of Don confluents. At the territory of the region flow Severniy Donets, Don and Dnepr rivers basins. Northern part of the region is situated in forest-stepped zone, south-western part – in stepped zone. The highest point of the region is 277 above the sea level is situated at Prokhorovka district. The lowest one – at the bottom of Oskol and Severskiy Donets rivers. Main rivers: Severskiy Donets, Oskol, Vorskla, Tikhaya Sosna.

The climate is moderate continental, middle temperature of the January is 8-9 degrees below zero, middle temperature of July is 18-20 degrees above zero. Rainfall amount comprises 559-62 mm per year. Middle yearly wind speed in the region is
2.1-4.1 m/sec. Fogs are more frequent at the cold time of the year, rarely and briefly met in summer.

Natural feature of the region vegetation cover is the insular distribution of broad-leaved forests, oakeries and zones with steppe vegetation. Total forest square comprises a bit more than 247 thousand ha, including forest soils fund – 229.9 ha. Region vegetation includes over 1 300 species, united to 524 sorts and 106 classes. Artificial vegetation communities are represented by farming ecosystems, where one can trace the monoculture breeding tendencies.

**Mineral raw and material base**

Belgorod region – is highly developed industrial and agricultural region, with the economy, basing at colossal mineral wealth and unique black soils “chernozyom”. Third of whole Russian iron ore extraction accrues to Belgorod region, steel marks and rolled metal products, corresponding with world standards are also produced here.

The Belgorod region takes leading positions among the central regions of Russia in variety and diversity of mineral resources and the prospects for the development of the iron and steel industry and the building materials industry, and such minerals as iron ore, chalk, cement marl are of national importance. There are more than 80% of the reserves of rich iron ores of the Kursk Magnetic Anomaly Basin in the region – 40,5%, which comprises almost the half of all the explored reserves of these ores in Russia. By qualitative indicators of ore, in natural form or after concentration processing, satisfy all the current technologies of metallurgical production, as well as powder metallurgy, production of ferrites, electronic and battery industry, obtaining high-quality mineral paints.

Huge deposits of bauxites, apatites, mineral underground waters (radon and therapeutic table water), numerous deposits of construction materials (chalk, sand, clays and others) were discovered and in various extents developed. There also were discovered kicks of gold, graphite and rare metals, with the prerequisites of exposure of platinum, diamonds, hydrocarbon crudes, and other mineral resources.

One of the main wealth types of Belgorod region - is unique black soil type, called “chernozyom”, which comprise 70% of the region soil fund, defining the successful development of agricultural sector. There are 1,4 ha of farmland per capita, including 1,1 ha of tilled areas.

**Mid-year population**

Gross regional product

In 2018 the gross regional product according to evaluation in current basic prices comprised 835,2 billion rubles or 117,5 % in comparable prices to the period of 2013.

Leading sectors, supplying the main volume of gross regional product are: industry, agriculture, transport and communication, construction, to which accrues over 80% of produced GRP.

In the volume of gross regional product per capita, region is at the 3rd place in Central Federal district second only to Moscow and Moscow district on the 19th place among the regions of the Russian Federation.
Industrial production

Industrial production is the basis of Belgorod region economic potential. Activity of region government is directed on creation of sustainable development terms for industrial enterprises basing in adoption of innovative resource saving and highly productive technologies, performance of technical reequipping and reconstruction of acting production facilities, formation of advanced technological level production facilities with high raw material processing level, providing quality increase and competitiveness of the production, labor productivity and reducing the production costs.

As the result, the volume of the dispatched goods of own production, executed works and services by own means in industrial type of activities over 2018 comprised 858,1 billion rubles and has risen at 1,6 times in present prices in comparison to 2013.

Over 80% of dispatched industrial production is supplied by manufacturing industries. Among the regions of Central Federal District in volumes of dispatched goods, executed works per capita according to the economic activity type Belgorod region takes 3rd or 4th place.
The realization of measures for industrial potential perfection of the region, competitive recovery and production diversification and economic activity of business units secured the increase of industrial production in comparable circumstances over 2014-2018 at 126.6% in comparable circumstances.

Today at the territory of the region there is competitive ore and mining combined complex, which enterprises produce one third of national iron ore concentrate volume, produce the best sorts of steel and rolled steel products of high demand in international market.

Leading enterprises are AO “Lebedinskiy GOK”, OAO “Stoylenskiy GOK”, AO “Oskolskiy metallurgicheskiy kombinat”, OAO “Kombinat KMAruda”, AO AO «Yakovlevskiy GOK».

Food and processing industries are represented by sugar production plants, meat-processing plants, and dairy- and grain mill plants, canning factories, fodder production plants and other enterprises. Agricultural production index of such economic activity type has risen up 1.3 times over 2013-2018.

The measures taken by manufacturers to modernize production improve quality and expand the range of products, introduce innovative technologies, facilitate the production volume.

Machine building complex of the region is represented by readymade metallic construction production, machine and equipment, electric appliances, transport means and equipment production. Enterprises produce pipelines, flexible joints, boiler equipment, forged pieces, stamping, bread making equipment, ore mining facilities and its spare parts, agricultural machinery, railroad and automobile cisterns, pipeline fittings, centrifugal pumping equipment, motor-and-tractor equipment, petrochemical equipment, mechanical processing goods, steel cutting tools, bridge and metallic constructions of superstructures, non-standard equipment.

Development of the construction materials industry is performed with application of available deposits of mineral resources in the region. Plans in construction of new or modernization of acting manufactures in production of building materials, which haven’t been produced or were produced in small amount earlier, were realized over last few years. More production, satisfying the actual requirements is also being produced in the region. The largest enterprises of industry are ZAO “Oskoltsement”, ZAO “Belgorod tsement”, AO “Nonstandard equipment and metalware plant”, OOO “Association of building materials and household appliances”, OAO “Zavod GBK - 1”, AO “Stroimaterialy”, OAO “Belgorodstroydetal”, ZAO “Belspala”, OAO “Belgorodasbestsement”, ZAO “Aerobel”, AO “Melstrom”, OOO “Gubkin plant GBI”, OOO “Construction materials plant”, OOO “Belgorod plant of metal concrete materials and pipes”, OOO “Zavod ArBet”.

Projects in construction of plants for pharmaceuticals substances production, readymade pharmaceuticals and veterinary preparations, which are supporting for created biopharmaceutical cluster. Cluster development program was approved by the Ministry of economic development of the Russian Federation. In order to unite the efforts of businessmen, educational and scientific institutions, and adjoining
supporting organizations in realization of cluster policy by the enterprises and scientific organizations of Belgorod region a multilateral agreement on cluster formation was signed.

Total cooperation coordination within the cluster is performed by the cluster development center – regional state founded institution “Belgorod regional resource innovative center”. Among leading enterprises, which form the basis of biopharmaceutical complex, are: OOO “Advanced Pharma”, OOO “PIK-PHARMA LEK”, UK “Belpharma”, Belgorod branch office of AO “Veropharm”, OOO “Polisintez”, OOO “PIK-PHARMA KHIM”, OOO “Agrovet” and also organizations, forming veterinary preparations production complexes at the territory of industrial park “Severniy” OOO “Belpharmacom” and OOO “NPF VIC”.

**Agroindustrial complex**

Belgorod – is one of the leading regions in agricultural goods production in the Russian Federation. Dynamically developing, highly technological, competitive agricultural production was formed in the region. With 1,1% of country’s population and approximately the same amount of arable land, Belgorod produces today 4,0% of the national agricultural production volume.

At the moment technological base of cattle breeding industry is almost formed in the region. There were created facilities for 830 tons of poultry and over 850 thousand tons of pork meat in live weight per year production.

Federal program “Development of agriculture and fish farming in Belgorod region in 2014-2020” is being successfully realized in the region. Within the program framework in 2018 Belgorod region has received over 1,7 million tons of cattle and poultry (in live weight), production volumes increased by 13% over 5 years.

Belgorod region continues to take leading positions in supply of cattle breeding production at national market. In 2018 in realization of pork and poultry meat in live weight in agricultural organizations region has taken first places among the regions of the Russian Federation, in milk production – third place among the regions of Central Federal District.

Leading enterprises are:
- in poultry meat production: ZAO «Prioskolie», OOO «Belgrankorm». Moreover, OOO «Belgrankorm» produces duck meat, OOO «Regioninvest» - turkey meat; 
- in milk production: OAO Dairy plant «Avida, and group of companies «Green Dale»;
- In sphere of protected ground vegetable farming: ООО «SPK «Teplitsy «Belogoria», ООО «Teplichniy complex «Belogorie»;

Due to improvement of crops structure and crop rotation, wide implementation of new highly yielding sorts and hybrids, adoption of intensive resource –saving technologies of soil cultivation, application of highly productive wide cut agricultural machinery with application of satellite navigation during fertilizer treatment, sowing, sowing cultivation, and harvesting Belgorod region reaches high level results in crop growing. Biological soil cultivation system is being implemented in the region with the aim to preserve and replicate soil fertility.

Region crop growing industry harvest in 2018 comprised over 3,4 million grain crops and pulse crops (in weight after refinement) with middle yield – 46,0 c/ha (in 2017– 48,0 c/ha), about 2,5 million tons of sugar beet with middle yield – 414,7 c/ha, 403,0 т thousand tons of sunflower with average yield 27,8 c/ha.

As the result of measures undertaking agricultural production produce over 2018 has reached 230,3 billion rubles, what is higher in comparable prices at 1,2 times.

In agricultural production produce in reliance per 1 ha of arable land (153,0 thousand rubles) Belgorod region has overpassed the index 100 thousand rubles first from the constituents of the Russian Federation.

The output of agricultural products in the region comprised:
  in 2016 – 228,3 billion rubles, incl. crop production – 81,6 billion rubles, livestock - 146,7 billion rubles;
  in 2017 – 227,3 billion rubles, incl. crop production – 69,9 billion rubles, livestock - 157,4 billion rubles.
A number of promising investment projects in the most import-dependent areas aimed at creating a competitive and efficient agriculture are being successfully implemented in the region today: developing the production of greenhouse vegetables, fruit and berry crops, aquaculture, biological additives, veterinary drugs, and components for fodder production.

Along with the development of industrial agricultural production, in order to increase the employment level of the rural population of the region, great attention is paid to state support for the development of small farms in rural areas. Since 2007, the oblast has been implementing the departmental program “Family farms of Belogorye”, which not only solves the issue of production and processing of agricultural products produced in personal subsidiary and peasant farms, but also the issue of its implementation.

**Legislation in investment sphere**

Number of regulatory legal acts, stimulating investment activity, function in Belgorod region:

- Law of the Belgorod region from 1st July 2014 № 284 «On investment activity in Belgorod region»;
- Law of the Belgorod region from 1st of April № 270 «On regulatory impact assessment and regulatory legal acts expertise in Belgorod region»;

**Investment attractiveness,**

**peculiarities of business climate of the Belgorod region**

Active investment policy of the Belgorod region, directed on strategic issues solution in modernization of economy and renovation of industrial sphere, its
diversification, which secures the formation of advantageous investment climate and makes the region more optimal place for production facilities location of any branch specialization.

The trends in the factors of investment attractiveness in the constituent entities of the Russian Federation reflect the attractiveness rating of the Russian regions, which is formed by the Expert RA rating agency. For more than 20 years, the Belgorod Region is among the first ten regions of the country with the least integral investment risks. According to the results of the investment attractiveness rating of the Russian regions of 2018, conducted by the Expert RA rating agency, the Belgorod Region entered the top 10 Russian regions with the lowest investment risk, taking 5th place.

In the region, investment projects are being implemented in industry and the agro-industrial complex, road construction, and the social sphere, housing is being built, and comprehensive improvement of settlements in the region is under way. Since 2011, the annual volume of investments in fixed assets exceeds 120 billion rubles, which is about 1% of the volume of investments in the whole of the Russian Federation.

Effective mechanism for capital attraction into economics and social spheres and also a business activity stimulus are favorable organizational and economic terms for business activity performance.

Regional government guides the investment projects at the principal of “one contact” within the framework of implemented in governmental bodies project management; enters the agreements on social-economic cooperation between regional Government and investor;

In region acts land plots allocation system for industrial facilities building; business entities apply differential income and corporate property tax rates, income and corporate property tax rates of interest are being subsidized; attracted credit
resources rates are being also subsidized, work with the suppliers of electricity-, gas-, and water supply, support of investment volume, directed at corresponding engineering infrastructure development is also being performed.

Accepted programs «Investment climate improvement for attraction of investment in economy of Belgorod region in 2011-2015» and subprogram «Investment climate improvement and stimulation of innovative activity», federal program of Belgorod region «Economic potential development and formation of advantageous business climate in Belgorod region for 2014-2020» (set by the Governmental decree from 16th December 2013 № 522-пп) have provided the integration of realized measures in investment attraction for dynamic growth and diversification of regional economic and defining further perspectives of investment activity terms improvement.

Within the framework of the programs measures, directed at improvement of the legal framework in sphere of investment activity of the Belgorod region, creation of advantageous administrative environment and prepared infrastructure for investment attraction, improvement of financial mechanisms of further investment attraction, promotion of Belgorod region image as investment attractive region at the territory of Russian Federation and abroad, support of innovative production promotion at national and international markets, staff assistance of investment process. In order to expose in municipal regulatory and legal acts project of clauses, inducing excess obligations, prohibitions and restrictions for business entities and investment activity or providing its implementation in Belgorod region legislative impact assessment is being performed.

In order to activate investment activities, ensure additional investment in the regional economy and effectively interact with investors in the implementation of investment projects, in January 2011, Development Corporation was created with one hundred percent participation of the Belgorod Region, which formed portfolios of projects in innovation and investment areas.

The Law of the Belgorod Region dated July 1, 2014 No. 284 “On Investment Activities in the Belgorod Region” was adopted in order to develop the legal framework for regional investment legislation, expand investment incentives in the region, and strategic initiatives to ensure a favorable investment climate.

In order to improve the investment climate, the Government of the region actively cooperates with the Agency for Strategic Initiatives for the Promotion of New Projects ANO (hereinafter referred to as the Agency).

In 2015 in all municipalities of the region was implemented municipal investment standard, which is directed for favorable organizational and economical business operation terms creation and municipal units business reputation increase.

In 2016 and beginning 2017 in frame of project management institution there was implemented 22 municipal units of the region and 206 successful practices in small- and middle scale entrepreneurship development, formed by the Agency.
According to the National investment climate results over 2017, held by the Agency, Belgorod region is among top 20 regions and takes 11th place.

With the aim to attract the investment to the regional economy, new enterprises and high performance working places formation in 2017-2018 there was adopted a range of regional laws, aimed to improve the regiona investment climate and investors involvent level increase:

- in order to ensure preferential debt financing of investment projects implemented in priority industry sectors and aimed at introducing new technologies and products, a regional fund for industrial development was formed (Decree of the Government of the Region of February 6, 2017 No. 36-

- the possibility of direct appeal of investors and business participants to the Government of the region through the Investment Portal with the shortest possible time to consider emerging issues - 10 days instead of 30 (order of the Belgorod Region Government dated August 25, 2017 No. 409-

In 2018, financial support from the regional budget in the form of subsidies for reimbursement of the costs associated with the acquisition of equipment in order to create the production of goods (works, services ) in rural areas in the amount of 40 million rubles allowed to support 13 small businesses - participants of the “500/10000” Program;
- the city of Gubkin was given the status of the advanced socio-economic development territory (Decree of the Government of the Russian Federation of March 16, 2018 No. 274);
- bill drafts were adopted on regional measures to support residents of the territory of advanced development (laws of the Belgorod Region of April 24, 2018 No. 261 and No. 262);
- Approval of the rules for concluding special investment contracts at the regional level (Resolution of the Government of the Belgorod Region of May 28, 2018 No. 160-
пп);
- Establishment of lower tax rates for organizations that are participants in special investment contracts (Belgorod Oblast Law No. 275 of June 5, 2018);
- Establishment of preferential tax rates for organizations - management companies and residents registered on the territory of the Belgorod region not earlier than January 1, 2018, industrial (industrial) parks established from January 1, 2018 (Belgorod Region Law No. 315 of November 28, 2018);
- In June 2018, the White Wings business angels association was registered; the White Wings Association information portal (http://аибк.рф/) was launched to search for investment-attractive innovative projects and support the selection of mentors and investors for the successful implementation projects. A platform for interaction between the initiators of innovative projects, investors and large business enterprises is the annual Startup Fair. The first Fair of StartUp:Land projects was held in the direction of Agro & Foodtech on November 15-16, 2018 on the basis of the JSC "Development" Corporation with the participation of EFKO and the departments of economic development of the region, agriculture and environmental reproduction of the region;
- as part of the implementation of the regional program for the development of industrial (industrial) parks for the period up to 2020, construction of the industrial park “Fabrika” began (Resolution of the Government of the Belgorod Region dated July 2, 2018 No. 246-
пп) where at least 30 resident enterprises are planned to be located by the end of 2022 with the creation of at least 1,500 new job positions;
- under the Agreement on Cooperation between the Ministry of Industry and Trade of the Russian Federation and the Government of the Belgorod Region, 3 Belgorod enterprises (OOO Belgorod Metalwork Plant, Flagman OOO, PIF-FARMA LEK OOO) are included in the list of comprehensive investment projects of the Ministry of Industry and Trade of the Russian Federation in priority areas civilian industry in order to provide subsidies from the federal budget to pay part of the interest on loans for investment purposes (the planned amount of subsidies for the period of project implementation is about 200 million rubles);
- In order to create and develop the infrastructure to support export-oriented small and medium-sized businesses, in March 2018, a separate subdivision of the AO Russian Export Center in the city of Belgorod (Regional Export Center) was created. Until 2024, it is planned to allocate 331.9 million rubles of federal budget allocations and 13.3 million rubles from the regional budget to support export activities and product promotion to foreign markets;
To attract investment in the promotion of new projects and start-ups and ideas, the interactive crowd investing resource “Invest-Vitrina” was launched in September 2018 (https://invest-vitrina.com/ru/). This is a financial platform with a direct investment mechanism in the project with full protection of the interests of the initiator and investor, including through the digital economy tools: blockchain and smart contract;

- in order to create a semantic space for collective work of communities and active involvement of the business space of the Belgorod region in the National Technology Initiative with the support of the Agency for Strategic Initiatives, the implementation of the project “Tochka kipeniya Belgorod” (based on AO “Razvitie” Corporation), which has become the 17th platform in Russia.

**Innovative activity support**

To increase the effectiveness and competitiveness of regional economy, Belgorod region Government is actively performing methodical work in forming advantageous terms for activation of innovative support and involving the private business in technological development process.

Complex approach in innovative system of the region is secured by the laws and regulations.

- Law of the Belgorod region in innovative activity and policy, regulating the mutual relation of the innovative activity entities and state government acts at the territory of the region.

In order to create maximally comfortable terms for innovative activity activation and involvement of private business in innovative processes within the framework of tax incentive system, number of the laws, foreseeing the reduction of tax obligations at innovative business in specified tax types were adopted: concerning the reduces income tax rate installment, enlisted to regional budget, simplified taxation system, and differential rate for corporate property taxation.

Elements of innovative infrastructure, performing supporting and securing function for innovative enterprises at different stages of innovative process are also developed.

There are also centers of youth innovative creative activity, founded in the Belgorod state technological university n.a. V.G. Shukhov, are successfully functioning and open wide range of possibilities for scientific-technical activity of young people. Innovative business-incubator and technologic park, rendering office space for rent on favorable terms for small-scale innovative business, cluster development center, securing local cluster development, regional engineering center, providing the support in technical re-equipment of the enterprises, social sphere innovation center, technologies and innovations support centers, created with the participation of Federal institution of industrial property for intellectual property market development.

For preservation and support of regional scientific teams and certain scientist and also financing of research and development projects of small innovative enterprises, students, post-graduates and young researchers is
performed on the basis of co-financing from Belgorod region budget and the Fund for assistance in development of small scale enterprises in scientific-technical sphere.

As the result of undertaken measures by the Belgorod region Government in 2017 for the support and development of innovative activity, over the period there was detected a growth of innovative activity of enterprises in the region: relative share of innovatively active enterprises has risen in 0,7 positions and comprised 14,8 %, the technical innovation expenses has increased by 17% and comprised 23,9 billion rubles, volume of dispatched innovative production has risen by 79 % and comprised 101,1 billion rubles.

**Construction**

The volume of work performed by the “Construction” type of activity in 2013–2018 amounted to about 400 billion rubles, including 92,7 billion rubles in 2018 or 105,0% of the 2017 level (in comparable prices).

Volumes of construction work, traditionally, are performed in housing, road construction, as well as during construction, reconstruction, repair of social and cultural facilities.

Considerable attention is paid to the objects of education, health, culture, development of sports.

In 2013–2018, cultural institutions in cities and rural areas were introduced with more than 3,540 places, educational institutions with more than 8,050 places.

In 2018 in the field of education and culture the following facilities were built and reconstructed:

- the construction of a house of culture was carried out with the participation of the federal budget, с. Zelenaya Polyana, Belgorod region, overhauled three rural houses of culture;

- overhaul of more than 25 secondary schools of the region in 20 municipalities for a total amount of more than 780 million rubles.

In the field of health, as part of the modernization program in 2018, work was carried out at 86 facilities. In the framework of the project "Health Management" in the region built (repaired)
22 polyclinic institutions and installed 43 modular rural healthcare posts (RHP).

Attention in the region continues to be paid to sport; in recent years, four sports and fitness centers have been built and put into operation, 7 sports fields have been introduced with the participation of federal budget funds.

Housing policy in the region is aimed at creating conditions for providing all categories of the population with affordable, high-quality and comfortable housing. Within the framework of the Strategy for Socio-Economic Development of the Belgorod Region for the period until 2025, measures aimed at creating optimal conditions for the development of housing construction, and primarily for the construction of individual housing, which is identified as a priority, have been developed and are being successfully implemented.

The most significant achievement of housing construction of the region is its progressive growth. For the period 2010 - 2018, 11,6 million sq. m. were commissioned in the region meters of housing, of which 9,4 million square meters belongs to individual housing.

In terms of the amount of housing commissioned per resident, the Belgorod region has been among the top ten regions of the Russian Federation for a number of years.

Increasing the pace of housing construction in the region became possible thanks to state support for its priority area - individual housing construction. For the development of low-rise housing construction in the region, the tasks of providing land plots to developers on preferential terms are being solved.
In total, over 30 thousand hectares of land have been allocated for housing construction by AO «Belgorod mortgage corporation», over 17 thousand hectares of land have been allocated for construction. On the lands allocated by the corporation, more than 120 housing estates for individual housing construction have been formed. In 2010-2018, 46,5 thousand plots of land were allocated to individual developers, including 3,3 thousand plots of land to large families on preferential terms.

In order to create favorable conditions and a comfortable living environment in microdistricts of mass development, engineering arrangements of housing estates for individual housing construction with water supply, power supply, gas supply, and water removal networks within the framework of annually accepted programs are carried out at high rates.

On the territory of the Belgorod Region, effective mechanisms have been developed to provide financial support to developers, primarily, public sector employees, large families and young families.

Since 2014, housing construction has been carried out as part of the state program “Providing affordable and comfortable housing and utilities services to residents of the Belgorod Region for 2014-2020”, according to which a set of measures is being implemented aimed at encouraging investment activity of participants in the housing construction market and creating conditions for integrated this sector of the economy.

**International economic activity**

The foreign trade turnover of the region for 11 months of 2018 was formed in the amount of 4,399,2 million US dollars (109,9% to the corresponding period of 2017). Exports amounted to 3,054,9 million US dollars (120,5% compared to the corresponding period of 2017), import - 1,467,3 million US dollars (91,6% to the corresponding period of 2017). In the 11 months of 2018, the trade partners of the Belgorod Region were 125 foreign countries and countries, which is 1% more for the 11 months of 2018.

The volume of trade with the CIS countries for 11 months of 2018 amounted to 1,553,9 million US dollars (96,4% compared to the corresponding period of 2017). Exports amounted to 816,3 million US dollars (118,2% of the corresponding period of 2017), imports – 737,6 million US dollars (80,1% of the corresponding period of 2017).

The main export types of goods from the CIS countries are: metals and metal products (45,8%); food products and raw materials (23,3%); engineering products (12,4%); chemical products, rubber (7,5%). The main types of imported goods from
the CIS countries are: metals and metal products (37.7%); engineering products (29.6%); chemical industry products, rubber (11.5%).

For 11 months of 2018, the volume of trade with non-CIS countries amounted to $2,845.3 million (119.1% of the corresponding period of 2017). Exports amounted to 2,238.6 million US dollars (121.5% to the corresponding period of 2017), imports - 606.7 million US dollars (111% to the corresponding period of 2017). The main export types of goods from foreign countries: metals and products from them (87.7%); mineral products (5.6%); food products and raw materials (5.4%). The main types of imported goods from foreign countries: engineering products (37.4%); chemical products, rubber (29.8%); food products and raw materials (16.9%).

The turnover of foreign trade with remote countries is 1.8 times higher than the turnover with the CIS countries.

The main trading partners of enterprises and organizations of the region for 11 months of 2018 are: Ukraine (20.0%), Italy (12.8%), Germany (7.1%), Belarus (5.2%), Kazakhstan (5.0%), Turkey (5.0%), Spain (3.9%), Uzbekistan (2.9%), France (2.7%), China (2.7%), Algeria (2.6%).

The share of trade with the CIS countries and far abroad in the total volume of foreign trade turnover for the 11 months of 2018 was 35.3% and 64.7%, respectively.

In March 2018, the first regional division of the AO «Russian Export Center» (REC JSC) was opened in the Central Federal District in the region. Kursk and Voronezh regions are included in the area of responsibility of the Belgorod subdivision. The Belgorod subdivision of REC JSC on a regular basis provides advice on integrated exporter support tools, assists in obtaining the services of REC JSC, provides training and master classes. The whole range of services is state support and is provided free of charge, or in order to subsidize actual expenses incurred.

Under the direction of export support fall all countries of near and far abroad, including the countries of the customs union.

For any information that interests you, you can contact the office of JSC "REC", which is located at the address: Knayza Trubetskogo Street, 24 (Business Center "Mont Blanc") office 301, or by phone +7 (980) 524-44-44; +7 (920) 206-22-67.

According to the results of 2018, within the framework of the Agreement between the Government of the Belgorod Region and the Russian Export Center JSC on cooperation in export activities, regional enterprises attracted grants totaling more than 13 million rubles, non-financial services provided to more than 45 companies, export insurance and financing. In 2018, the volume of supported exports amounted to more than 74 million US dollars.

**Small and middle-scale entrepreneurship**

According to the unified register of small and medium-sized businesses, the FTS of Russia in the region as of January 1, 2019, have 64,7 thousand small and medium-sized businesses, which employ more than 147,97 thousand people. The turnover of this sector of the economy in 2018 will be estimated at more than 774,8 billion rubles.

Due to their mobility and ability to work in a narrow segment, small and medium businesses contribute to solving such important tasks as saturating the
market with goods and services of their own production and reducing dependence on imports, providing employment, increasing tax revenues, and creating a general business environment.

State support of small and medium-sized businesses is carried out in the framework of the subprogramme “Development and State Support of Small and Medium-Sized Businesses” of the state program of the Belgorod Region “Development of the economic potential and formation of a favorable business climate in the Belgorod Region” approved by the Decree of the Government of the Belgorod Region for 2014-2020”, which includes a set of activities on information and education, financial and property support of small and medium-sized businesses.

The state support system covers all categories of small and medium-sized businesses and operates through established organizations supporting entrepreneurship infrastructure: the Microcredit Company Belgorod Regional Fund for Supporting Small and Medium-Sized Businesses, the Belgorod Regional Resource Innovation Center, the Belgorod Guarantee Fund for Lending, business incubators, a technology park, industrial parks «Severny», «Volokonovsky» «Fabrika», «Kotel»), business space «Contact». These institutes provide versatile business services, as well as contribute to the establishment in the business environment of the principles of civilized business practices, the development of business culture, the formation of a positive image of Belgorod producers of goods and services.

In order to improve the quality and availability of public and municipal services, including those rendered to small and medium businesses, a network of multifunctional centers providing state and municipal services (hereinafter referred to as the MFC) has been created in the region. Currently, there are 23 MFCs and 206 territorially separate structural units (TOSP) in the region.

In pursuance of the “roadmap” of introducing the Target Model “Support for Small and Medium-Sized Businesses” in 2018, approved by the Governor of the Belgorod Region on March 23, 2018, a cooperation agreement was signed between GAU BO MFC and JSC Rosselkhozbank No. RSBB-030-29-80-2018 on the establishment of the Center for the provision of services for business in the form of a territorially separate structural subdivision of GAU BO "MFC" (Belgorod, Pushkin st., 49), OGAU "MFC Gubkinsky urban district" (Gubkin, Komsomolskaya str., 51) and OGAU "MFC Stariy Oskol urban district" (the city of Stariy Oskol, md. Solnechny, d. 1A);

- in order to popularize support tools for business entities in the Belgorod Region, a tripartite agreement was concluded between the Federal State Autonomous Institution “Russian Foundation for Technological Development”, Microfinance Company Belgorod Regional Fund for Small and Medium-Sized Business Support and the State Budget Institution “MFC” dated 28 June 2018. The subject of the cooperation agreement is joint activities to provide information and consulting and reference support for industrial enterprises in the MFC for business windows to participate in competitive procedures for state support programs, as well as on financing terms and procedure for selecting projects for financing programs of the
Industrial Development Fund.

Since 2005, the Belgorod Region has been taking part in annual competitions of the Ministry of Economic Development of Russia for the selection of constituent entities of the Russian Federation for the provision of federal budget subsidies for state support of small and medium-sized businesses, which are used for co-financing from the regional budget.

In 2018, 110,3 million rubles were spent on measures for state support of small and medium-sized businesses, organizations that form the infrastructure for supporting business entities under the subprogram, of which 67,6 million rubles were for the federal budget, 42,7 million rubles for the federal budget.

In 2018, in order to promote the development of small and medium-sized businesses, increase its competitiveness and increase productivity, small and medium-sized businesses have the opportunity to receive grants to pay the first installment on equipment leasing contracts, preferential targeted loans, sureties, subsidies for the development of social entrepreneurship, informational, educational and consulting services.

In 2018:

- The microfinance company Belgorod Regional Fund for the Support of Small and Medium-Sized Enterprises gave 122 target loans in the amount of 256,4 million rubles to small and medium-sized businesses;

- The Belgorod Guarantee Fund for Lending Assistance provided 65 guarantees to SMEs in the amount of 999.7 million rubles, which made it possible to attract credit resources in the amount of 3,653.8 million rubles to small and medium-sized businesses;

- property support was provided to 96 SMEs (production business incubator in Volokonovka - 1 entity, Severny industrial park and production business incubator - 38 subjects, innovative business incubator and regional technopark - 57 subjects);

- 607 state and municipal services were provided to SMEs in the business area in the Municipal Unitary Enterprise in the Municipal District Belgorod City, 464 in the Municipal Institution Municipal Unitary Enterprise in the Gubkinsky Urban District - 464, in the MFA in the Stary Oskol urban district –176.

As part of the information and consulting and educational services, the Center for Entrepreneurship Support for potential and existing entrepreneurs held 39 thematic training seminars where 913 people were trained, 858 potential and existing small and medium-sized businesses were provided with information and consulting services.

Tourism

In order to implement the changes in the federal legislation in the field of tourism, the Law of the Belgorod Region was adopted on December 29, 2016 No. 138.
“On the regulation of individual issues in the field of tourism”, defining the powers of the state authorities of the Belgorod Region to create favorable conditions for the development of tourism in the region.

The Department of Economic Development of the Belgorod Region is determined by the authorized executive authority to create favorable conditions for the development of tourism in the region in accordance with the decree of the Government of the Belgorod Region No. 10-rp dated January 16, 2017

“On the definition of the authorized executive body of the Belgorod region to create favorable conditions for the development of tourism in the Belgorod region”.

In the framework of the implementation of the powers of the economic development department of the region, the Decree of the Government of the Belgorod Region of December 18, 2017 No. 475-pp approved the administrative regulation for the State Department of Economic Development of the Belgorod Region to provide the state service “Accreditation of organizations that classify objects of the tourist industry, including hotels and other accommodation facilities, ski trails and beaches.

In 2018, the Department of Economic Development of the region accredited three organizations for the classification of hotels and other accommodation facilities.

As part of the implementation of the activities of the subprogram "Development of tourism, crafts and roadside service" of the state program of the Belgorod region "Development of the economic potential and the formation of a favorable business climate in the Belgorod region for 2014–2020, approved by Decree of the Government of the Belgorod Region of December 16, 2013 No. 22-pp (hereinafter referred to as the state program of the Belgorod Region), in 2018, 27 event tourist events were organized and held, which gathered more than 130 thousand spectators and participants.

In 2018, the Belgorod region took the 9th place for the second time in the National ranking of the development of event tourism in the Russian Federation and entered the Golden League "The Best of the Best". 83 subjects of the Russian Federation took part in the ranking, on whose territory tourist events were held (excluding Moscow and St. Petersburg).

According to the results of the National Rating of Tourist Attraction of the Regions - 2018 (a joint study of the magazine "Rest in Russia" and the CEC "Rating"), the Belgorod region ranked 34th in the ranking, gaining 67,7 points, rising by 14 points and improving the result of the previous year by 13, 6 points (2015, 60th place – 31,8 points; 2016 - 50th place – 44,3 points; 2017, 48th place – 54,1 points).

According to the results of the expert tour, the Committee for the Implementation of the Import Substitution Program under the Expert Council for the Development of Tourism under the Ministry of Culture of Russia approved the regional tourist route «Reserved Corners of Belogoriya» with the assignment of the «brand route» category.

As of January 1, 2019 there are 193 collective accommodation facilities with a total capacity of 4,479, and 11,654 beds in the region. Category certificates have sixteen hotels in the region.
Transport infrastructure

The most important highways of interstate significance pass through the Belgorod Region, connecting Moscow with the southern regions of Russia, Ukraine and the South Caucasus. The federal highway M-2 “Crimea” (Moscow-Belgorod-Ukraine’s border) passes through the territory of the Belgorod Region. Both local and international transportation is carried out. The length of public roads with hard surface – 19.9 thousand km, the density of public roads with hard surface per 1 thousand square meters km – 734.3 km. The cities, towns and villages of the region are connected by a single network of paved roads.

The operational length of public rail tracks is 700 km, the density of public rail tracks is 10 thousand square meter km territory is 258 km.

There is an airport in the city of Belgorod, which has international status. As a result of the implementation of the project “Reconstruction of the Belgorod Airport”, the airport’s carrying capacity increased to 450 passengers per hour.

The favorable geographical position of the region at the intersection of the Asian-European transport corridors makes it possible to use the transport infrastructure for the transit of foreign trade cross-border freight traffic.

Communication

Today communication is one of the most promising and dynamically developing basic infrastructure industries with the potential for long-term economic growth.

The successful functioning of modern intelligent systems and services is impossible without a high-quality telecommunications infrastructure. Guided by the need for its development in order to provide broadband access to the Internet, especially in rural areas, the region is working to connect institutions of education, medicine, culture, local governments, executive bodies of the region.

Solving the problem of eliminating digital inequality, telecom operators in the region are building Wi-Fi networks in rural areas, ensuring equal uninterrupted access to information by the population.

On the territory of the Belgorod region cellular communication services are provided by 5 operators, which ensures a high level of competition. To date, the network covers the territory in which more than 90% of the inhabitants of the region live. At the same time, the subscriber base of operators is about 2.5 million people.

Education

Ensuring the availability of services of preschool education and improving its quality is one of the priorities of the regional policy in the field of education. The services of preschool education, development, supervision and care cover more than 74 thousand children, which is 71% of the number of children of preschool age living
in the Belgorod region. Along with the traditional measures in the region, active work is underway to develop non-state forms of pre-school education. Creation of conditions for citizens of the region to obtain general education takes into account the demographic situation, territorial accessibility and educational needs of children and adolescents. The system of general education is represented by 551 general educational organizations with a student enrollment of 159,5 thousand students.

The system of secondary vocational education of the Belgorod region is represented by 34 professional educational organizations (hereinafter - PEO), of which 33 are state, 1 non-state. 100% VET areas are autonomous. The total number of students is 21,115 people. The number of teachers - 1,581 people.

As part of the implementation of a model of public-private partnership in the field of personnel training, interaction with employers in the region was organized. 24 enterprises are anchor employers, 1 480 - partner enterprises.

In 2018, in 33 PEO areas, taking into account the principles of dual education, 98 professional educational programs were implemented (93% of the total). The number of students under the dual training program was 14,800. Dual training is organized on the basis of 1,480 enterprises of the region. At enterprises, 4,012 mentors are assigned to the students. Employment of PEO graduates in the region for jobs is 45%, about 16% of graduates continue their education, 32% are recruited into the ranks of the Russian Army, more than 3% of graduates apply to employment services, 4% leave for childcare.

The higher education system in the Belgorod region is represented by 13 higher education institutions and branches of universities, of which 11 are state, 2 are non-state, 7 are branches, with a total number of about 60 thousand students, over 1,500 post-graduate students and doctoral students. Also, more than 4,000 foreign students, graduate students and students from more than 80 countries study in the region. Currently, universities are preparing for 316 specialties. In organizations of higher education there are 22 dissertation councils for the defense of doctoral and master's theses in 50 specialties.

In the Belgorod region, universities are supported under the subprogram “Development of university science” of the state program “Development of personnel policy of the Belgorod region for 2014–2020,” which provides support for research and development in the system of development of territorial clusters in the economy and social sphere of the Belgorod region, propaganda and popularization of scientific ideas among the population of the Belgorod region; material support and support for promising students, graduate students and doctoral students. In addition to educational activities, universities implement a number of projects aimed at the socio-economic development of the region. There are 146 small innovative enterprises in the region. In the system of project management, the problem of ensuring the connection of the university science with academic science, on the one hand, and with the industrial sector of the economy, on the other, is solved. Within the framework of practice-oriented teaching, universities in the region have established basic departments at partner enterprises.
More than 1,500 agreements on cooperation with the farms of the region have been concluded for the provision of practical training to students and the creation of divisions of practical and project-based training in production. The interaction of universities with the production sector is also carried out at the level of laboratories, research centers and pilot production sites.

In order to ensure a close relationship between the educational services market and the labor market, Professional Adaptation and Employment Centers have been created, on the basis of which an automated information system for the employment of graduates operates.

Close interaction with the employer allows you to increase the level of employment of graduates in the specialty. The share of employed graduates from leading universities in the region reaches 80%.

**Healthcare**

The infrastructure of the health care industry is represented by a three-tier system of medical care, which includes 17 medical institutions that provide primary medical care. The second level is provided by 11 inter-municipal medical organizations in the districts of the region and in the regional center. The third level - 19 medical institutions that provide specialized, including high-tech assistance.

High-tech medical care at the expense of the regional and federal budget and the funds of the Federal Mandatory Medical Insurance Fund is provided by six medical organizations. The material and technical base and personnel potential of medical organizations allow performing complex surgical interventions in the following profiles: «cardiovascular surgery», «neurosurgery», «traumatology and orthopedics», «organ and tissue transplantation», «pediatric surgery in the newborn period», «oncology, otolaryngology, pediatrics, urology, ophthalmology».

In total, in 2018, 7,194 (6,371 patients in 2017) received high-tech medical care in various profiles.

The region is among the leaders in the Central Federal District in terms of the intensity of development of innovative medical technologies.

Positive results of the industry in 2018 were the achievement of one of the targeted medical and demographic indicators - a decrease in the mortality rate of the population from all causes. The mortality rate per 1000 population was 13.4, which is 0.3%, below the level of the same period (2017 – 13.5 per 1000 population).

Also in 2018, there is a decrease in mortality rates in comparison with the same period of 2017 from:
- tuberculosis - by 50%, amounting to 0.5 per 100 thousand (2017– 1,0);
- external causes - by 3.1%, amounting to 68.9 per 100 thousand population (2017, 71,1).
- from neoplasms ¬ to 0,03%, reaching 196,49 per 100 thousand of population (2017 – 196,54).
An important step in the provision of specialized outpatient care for oncological patients was the opening of a new polyclinic on the basis of the OGBUZ Belgorod Oncology Center.

As a result of the municipal-private partnership in the city of Stary Oskol, the Heart Clinic was opened, specializing in the provision of high-tech medical care in the field of cardiovascular surgery.

On the basis of OGKUZ «Hospital for War Veterans» a geriatric center for the provision of medical care to persons of elderly and old age has been opened.

An effective tool for the development of the industry at present is the project activity.

Through the implementation of the federal project «Lean Polyclinic», a new model of a medical organization is being created that provides primary health care on the principles of lean manufacturing. The goal of the project is to increase public satisfaction with the quality of medical care provided in outpatient settings.

As part of the informatization of the healthcare industry in 2018, the Belgorod Region is a leader in the Russian Federation in issuing “E-sheets of disability”.

Telemedicine technologies have been introduced into medical institutions in the region, a result of advances in telecommunications technologies in the field of healthcare. Thanks to telemedicine technology, medical professionals exchange information in real time. Fundamentally new opportunities were created for monitoring processes in all areas of the health care industry.

As part of the implementation of the socially significant regional project «Health Management», initiated in 2016 by the Governor of the Belgorod Region Yevgeny Savchenko, measures are being continued to improve primary health care. The strategic goal of the project is to increase the life expectancy of the population of the Belgorod region by 2020 to 76 years - a paradigm shift in the existing system is envisaged: «from the treatment of diseases to their prevention».

During the period of implementation of the Health Management project, about 450 offices of a family doctor and medical and obstetric centers were built and repaired in the region. 42 modular buildings were installed.

In 2018, the following construction objects were put into operation: Family Medicine Center in s. Bekhteevka Korochansky District, Clinical Diagnostic Center in Maslova Pristan Village, Shebekinsky District, Clinical Diagnostic Center in Severny, the Family Medicine Center was opened in Gubkin 9 modular buildings were installed to accommodate obstetric points in the villages of the Belgorod region.

In the Belgorod region, projects in eight priority areas are currently being implemented in the health sector: development of cardiology, oncology, dental services, obstetric services, reduction of paper workflow in medical organizations, improvement of laboratory services, thrifty polyclinic and fertility promotion.

In the portfolio of projects in the health sector of the region, the implementation of federal projects - “Healthcare” and “Demography”, aimed at the development of the primary health care system, the fight against cardiovascular diseases, the fight against cancer, the development of children's health care, medical care for children, provision of health care organizations with qualified personnel, creation of a single
digital circuit in health care on the basis of the unified state health information system (EGISZ), export development of health services, the development and implementation of system support programs and improving the quality of life of senior citizens, the formation of the system of motivation of citizens to a healthy lifestyle including a healthy diet and avoiding harmful habits.

**Physical culture and sport**

Great attention is paid to the development of physical culture and sports in the Belgorod region. The formation of a healthy lifestyle of the population, the increase of social activity, the prolongation of life, the preservation of the image of the All-Russia Sports and Tourism Center across the region is one of the priority areas of the Belgorod region.

The development of the mass culture of physical culture and sports among broad sections of the population, the strengthening of the material and sports base, the improvement of work with physical training personnel, the search for and introduction of new forms of physical culture and sports, and the growth of sports skills of the Belgorod athletes and teams are the main activities in this area.
- Increase in the proportion of regularly engaged in physical culture and sports;
- construction of new and reconstruction of old sports facilities;
- Involvement of all population groups in the sporting events organized by the Administration.

In the region, a clear system of organizing and conducting district, city and regional sports and health and sporting events among the population of different ages is established, which is formed in accordance with the annual regional interdepartmental calendar plan for physical and sports work.

Work continues on the inclusion of sports facilities located on the territory of the region in the All-Russian Register of Sports Objects.

One of the priorities is the further development of the sports infrastructure at the expense of federal, regional, local budgets and extra-budgetary sources, including through the use of public-private partnerships and concession agreements, participation in the Gazprom-to-children investment program.

Increasing the massiveness of physical culture and sports among different age groups of the population and, first of all, among able-bodied population is solved by:
- search for new organizational and managerial forms for the creation of effective systems for strengthening the health of workers;
- further implementation of the All-Russian TRP complex;
- attraction of means of off-budget sources for strengthening of physical base of physical culture;
- implementation of organizational and managerial approaches for employees of enterprises to create conditions for physical training and sports;
- organization of measures to stimulate the development of the market of sports services;
- Creation of conditions for the organization of physical culture and health and sports work among young people;
- development and implementation of a monitoring system for physical
development and physical readiness of young students with a view to the rapid analysis of the situation and the development of appropriate physical education programs, the formation of a healthy lifestyle, and the optimization of the physical education of pre-conscripts and conscripts;

- holding, which became traditional sports and sports events:
  - the traditional regional "Cup of R.P. Frolova" in rhythmic gymnastics;
  - Regional Olympics of pre-conscription youth;
  - traditional mass sports competitions "Russian azimuth";
  - regional competitions for prizes of the club "Leather Ball";
  - All-Russian competition "Orange ball";
  - The annual All-Russian Olympic Day;
  - regional sports days among the teams of rural settlements (winter / summer);
  - The regional sports contest among the work collectives of the region;
  - All-Russian race day "Crossing the Nation";
  - All-Russia mass ski race "Ski Track of Russia";
  - All-Russian walking day;
  - Festival of Finnish walking;
  - a decade of sport and health;
  - All-Russian day of the athlete;
  - mini-football (futsal) among the teams of the general educational institutions of the Belgorod region (within the framework of the All-Russian project "Mini football - to school");
  - the main stage of the championship of the region in ice hockey for prizes of the "All-Russian Club" Golden Puck "them. A.V. Tarasova";
    - presidential sports games;
    - Presidential sports;
    - Games among the teams of municipalities and urban districts of the Belgorod region under the motto "For the physical and moral health of the nation";
      - "Spartakiada of the Belgorod Region among persons with disabilities";
      - Belgorod region volleyball competitions among men's teams of the amateur league, as well as the school amateur volleyball league among students of general educational institutions of the Belgorod region.

The conduct of the contests:

- All-Russian competition among the organizers of physical culture and sports in rural areas, the urban environment and the workplace;
  - All-Russian competition "Sports Family";
  - Teacher of health;
  - The competition among the municipal authorities of the Belgorod region, carrying out activities in the field of physical culture and sports for the best organization of physical culture and sports work;
    - All-Russian competition among the organizers of physical culture and sports in rural areas;
    - Regional review competition of educational organizations of higher education in the Belgorod region for the best organization of physical culture and sports work among students;
    - Regional review competition of professional skill "Best in profession";
Regional review competition "Best Sports School".
Organization of All-Russian shares:
1. All-Russian action "I choose sport!";
2. All-Russian action "Charge with the champion".

Carrying out of the specified sports actions, actions and competitions annually allows to involve to employment by physical training and sports more than 250-300 thousand person.

Creation of conditions for the organization of physical culture and health and preventive activities in most pre-school educational institutions of the region.

Development of disabled sports on the basis of:
- development of incentive mechanisms for heads of sports centers, sports and recreation complexes for the organization of invalid sports;
- studying and introducing the experience of organization of invalid sports in other regions of Russia and abroad.

Development of sports of higher achievements due to:
- Activities of the Regional Center for Sports Training;
- Creation of complex innovative (experimental) groups for cultivated in the field of sports and organization of scientific, methodological, medical and biological and information support for the training of athletes of the highest qualification and sports reserve;
- application of incentive mechanisms for prospective athletes and talented coaches;
- further development of promising Olympic (jumping, synchronized swimming, jumping on the trampoline, sports acrobatics, archery, equestrian sport) and national (campuses, billiards, darts, lapta, baseball) sports.

Training of professional staff, including:
- Creation of conditions for fastening young specialists in educational institutions, additional education for children, organization of sports training;
- provision of advanced training for specialists in physical culture and sports;
- Conducting an internship at the training staff of the trainee bases of the region;
- conducting "master classes" by leading trainers in sports.

For the development of a network of physical culture and sports institutions, the widespread involvement of the inhabitants of the region in active physical training and sports, it is necessary to continue the creation of simple flat sports facilities at the place of residence in cities and settlements, the arrangement of simplified sports halls in non-residential premises, the reconstruction of domestic hockey boxes and the equipment of new gaming sites, arrangement of places for employment by national and national kinds of sports, designing in park zones and zones of rest of routes terrenkur, ski and bicycle trails, as well as to solve the problem of effective use of sports facilities belonging to various departments and not used for their intended purpose.

It is expected that the ongoing development activities in the field of physical culture and sports will achieve by 2025 the following qualitative and quantitative results (indicators) of development:
- The proportion of the population systematically engaged in physical culture
and sports in the total population will increase to 48.2 percent compared to 19.5 percent in 2007 (Figure 5.45);
- the proportion of children engaged in specialized sports institutions in the total number of children aged 6 to 15 will increase to 51.3 percent, compared to 21.7 percent in 2007;
- the level of provision of the population with sports facilities on the basis of the one-time capacity of sports facilities, including for people with disabilities and disabled persons, will increase to 79% against 49.3% in 2017.

**Historical and cultural legacy**

Monuments of history and culture are unique evidence of the historical development of society and form part of the history of our region. Belgorodchina has a rich cultural heritage. Currently, on the territory of the Belgorod region, there are 2151 objects of cultural heritage, included in the single state register of cultural heritage sites (monuments of history and culture) of the peoples of the Russian Federation.

Almost every locality in the Belgorod region can be proud of some remarkable monument, a landmark or a memorable place.

The most numerous category of monuments of history and culture of the region are monuments of archeology - 856 objects. Among the most famous monuments are the Dmitrievsky complex, Hotmyzhsky hillfort, Krapivenskoye ancient settlement, Durovsky and Gorkin burial mounds, archaeological collections of which replenished the museum fund of the region with unique objects made of silver and gold.

Architectural monuments of the Belgorod region are a special kind of cultural heritage. Among all the arts, architecture is unique and unique. On the territory of the region there are 468 architectural monuments, 132 of them are objects of religious purpose. The most rich in the temple architecture Krasnogvardeysky district and Stary Oskol city district. The architectural monuments of the region were built in the XVIII-XX century, mainly in classical, Russian and brick styles. Among the most significant objects of architecture and town planning: "Round building" in the village of Golovchino in Graivoronsky district, Biryuchanski shopping arcades, built with the means of the merchant city of Biryuch - a sample of shopping buildings of the second half of the XVIII century, the Uspeño-Nikolsky cathedral in the town of Valuiki, Mihailoarhangelskaya church in the village of Borisovka, Troitskaya and the Church of the Cross Exaltation in Stary Oskol.

During the Great Patriotic War the territory of the region was the scene of fierce battles. In the summer of 1943, the largest tank battle took place near Prokhorovka, largely deciding the outcome of the Battle of Kursk and the entire Great Patriotic War. That is why almost one third of the monuments located in the region are monuments of military glory that perpetuate the heroic deed of the Soviet people in the Great Patriotic War. They are represented by common graves and solitary graves of soldiers and partisans, graves of civilians who died in battles with German fascist
invaders, as well as weapons and military equipment, memorial sites and memorials, military engineering facilities.

42 objects of cultural heritage located on the territory of the region are represented by monuments of art. Among them a monument to the general I.R. Apanasenko in Belgorod, monuments of V.I. Lenin in the village of Volokonovka, the town of Biryuch, Valuiki, the monuments of N.F. Vatutin in the village Mandrovo, with. Vatutino, town of Valuiki. These monuments are examples of Soviet monumental art.

In recent years, the following architectural monuments "Starooskolskoye Spiritual College" in Stary Oskol, "The House where in 1917 a meeting of representatives of workers of the Korochansky district took place, at which the Revolutionary Committee and the Uyezd Soviet were elected" (the former women's gymnasium) was held Korocha, "Manor house Kovalovsky Evgraf Petrovich, the beginning of the twentieth century" in the village. Yutanovka Volokonovskiy district, as well as monuments of military glory of federal significance, located in the villages of Nikolskoe and Voznesenovka Shebekinsky district, p. Berezovka of Borisov district. And also archaeological studies (excavations) of the ancient settlements of the Scythian time were carried out in the village of. Petropavlovka of Chernyansky district, village Borisovka, Borisov district, p. Streletskoye of the Krasnogvardeysky district.

**Contact Information**
